

Joseph C. Gafron

joeysgafron@gmail.com ❖ Portland, OR ❖ [linkedin.com/in/jgafron](https://www.linkedin.com/in/jgafron)

SUMMARY

Computer Science graduate (B.S., Honors) with 2 years of help desk experience and hands-on training in defensive security, network traffic analysis and digital forensics. Ranked in the top 15% of TryHackMe users across 30+ rooms covering SIEM fundamentals, Wireshark, and Linux forensics. Currently preparing for the Cisco CCNA certification and seeking an technical support role focused on software troubleshooting and issue resolution.

WORK EXPERIENCE

Office Administrator & IT Support Technician

October 2020 – January 2023

Bio Inspired Technologies

Boise, ID (Remote)

- Helped review suspicious phishing emails reported by staff, recorded relevant details in Excel, and shared team warnings through Slack when needed
- Provisioned VPN access for new engineering employees by authorizing endpoints, installing client software and resolving connectivity issues
- Modeled and verified 3D CAD designs in SolidWorks against technical documentation prior to production
- Communicated technical issues between customers and engineering staff, translating requests into clear documentation and tracking them through resolution

Culinary Team Member

October 2019 - Present

Willamette View

Portland, OR

- Ensured strict compliance with specialized dietary protocols for hospice residents, verifying meals against restriction lists to prevent life-threatening errors
- Served as informal team lead, training new staff, resolving operational conflicts, reallocating work during high-volume periods, and escalating critical issues to management
- Managed temperature logs and inventory auditing for a 300+ resident facility, identifying discrepancies and coordinating corrective actions to maintain

Additional Culinary Experience

June 2011 – October 2019

Mother's Bistro and Bar, Thai Bloom, McGrath's Fish House, Tavern at Bown

Boise, ID and Portland, OR

- Adapted quickly across multiple restaurant environments, following established procedures, learning new workflows, and maintaining consistent quality and safety standards

EDUCATION

Bachelor of Science in Computer Science, Cum Laude

June 2026

Portland State University | GPA: 3.68

Portland, OR

- Tau Sigma Honor Society
- Dean's List x5
- President's List x2

Culinary Arts Diploma

June 2019

Oregon Culinary Institute | GPA 4.00

Portland, OR

- Student Achievement Award
- Kitchen Leadership Award

PROJECTS

Digital Forensics Investigation

Project Lead - Academic Team Project (Digital Forensics), Portland State University

- Conducted a digital forensics investigation on a forensic disk image, performing evidence acquisition, artifact analysis, and timeline reconstruction using Autopsy, Plaso, and log2timeline

- Analyzed DHCP logs, network logs, ShellBags, and file system artifacts to establish user activity and a chain of custody
- Performed file carving (JPEG recovery) to reconstruct deleted or hidden evidence from unallocated disk space

Tools: Autopsy, Plaso, log2timeline, Windows/Linux filesystems, network log analysis

Adafruit Feather Wireless Tool

Academic Project (IoT Security), Portland State University

- Engineered and soldered a custom hardware monitoring node using an Adafruit Feather microcontroller and dedicated wireless modules to capture local wireless traffic
- Captured and inspected wireless network traffic in an authorized academic environment, analyzing packet structure and protocol behavior with Wireshark
- Executed packet crafting and injection tests using 802.11 protocols to evaluate device communication and network behavior

Tools: Microcontroller programming, hardware soldering/assembly, Wi-Fi packet analysis, firmware development

FlowMind | Productivity & Task Management Mobile Application

Academic Team Project (Capstone), Portland State University [Deployed on Apple Store]

- Integrated a generative AI API to turn user goals into structured task recommendations, improving the applications core workflow
- Used few-shot prompting to cut down generation errors and make AI output more consistent
- Built the auth and data layer with Firebase Authentication and Firestore security rules, keeping user data isolated between accounts
- Wired up Cloud Functions and REST APIs to connect the app, backend and AI service, working with a small team to debug integration issues across the stack

Tools: JavaScript, Firebase/Firestore, Cloud Functions, OAuth authentication, REST APIs, generative AI integration, LAM

Released on the Apple App Store; finalist in the Hollomon Health Innovation Challenge and Audience Choice Award winner at TiE Oregon Westside Pitch

Netflix-to-Anki AI Automation Tool

Passion Project

- Built an AI-powered automation tool that converts Thai-language subtitle content into study-ready Anki flashcards, eliminating a fully manual, multi-step workflow
- Integrated OCR (Tesseract), an AI model API, and text processing into a single end-to-end pipeline, from image capture to structured output
- Refined prompts and processing logic through testing to reduce malformed output and improve consistency across varied input

Tools: Python, Tesseract OCR, OpenAI API, Anki API, image processing, workflow automation

SKILLS

Security Tools: SIEM fundamentals, Wireshark, Nmap, Packet Analysis, Phishing Triage, Digital Forensics

Operating Systems & Infrastructure: Linux, Remote Desktop Protocol (RDP), Identity & Access Management (IAM), Virtual Private Networks (VPN)

Programming & Scripting: Python, Bash, C++, Git, SQL, Data Modeling

Cloud & Backend Architecture: Google Cloud Platform (GCP), Firebase, Firestore, Serverless Cloud Functions, Secure API Gateways

Networking Fundamentals: TCP/IP, UDP, DNS, DHCP, Subnetting, VPN Configuration

CERTIFICATIONS

Cisco CCNA (In Progress)

- Expected Completion September 2026

LANGUAGES

English - Native

Thai - Strong reading comprehension; intermediate listening; basic speaking
